

TRANSFER OF INFORMATION OVER THE MEMBRANE

In next image is shown how people - whatever distance is between them - are connected. Since we are all part (a sub-set) of the totality (the set) we can transmit and receive information. Just like a radio, when tuned in the correct harmonic resonance with the transmitting station, will receive that music and that news, people are both receivers and transmitters. Although some will be stronger and better in receiving, others will be more gifted (or trained) to transmit.

PERSONS (holons) CAN TRANSMIT INFORMATION ABOUT EVENTS (TELEPATHY) AND TRANSFER ENERGY (PRAYER, HEALING)

BY OSCILLATIONS INFORMATION IS TRANSMITTED OVER THE MEMBRANE AND CAN BE RECEIVED BY RESONANT HOLONS

THE MEMBRANE ACTS AS THE MEDIATOR OF VIBRATIONS

If we understand the concept of this interconnectivity we understand also why some people can't stand each other. If two people have a really different frequency they are dissonant or disharmonic to each other. Then, no real communication is possible. If one person became very rigid (dense, hard) by pelastrating disharmonic "events" into a holon which has inside two or more conflicting energies, he will not be able to receive positive vibrations of other persons. That person will have hard "layers", and no vibrations can pass. By healing, praying, insight or self-analyzing such hard spots can be depelastred, thus be un-knotted. When we un-knot in ourselves such hard spots we are free again to enjoy harmonic communication with others and with Nature.
